

Eliminator -The ultimate fly killer brought to you by the pioneers in the business of selling Insect Light Traps (ILT) in India. Eliminator works on the principle of Ultra violet light (UV). UV light attracts all flying insects except mosquitoes which intern get electrocuted. The dead flying insects get collected on a removable collection tray underneath the machine.

Eliminator can be used in all kinds of industries where there is zero tolerance for flying insects like Food and pharmaceuticals. It can be used in Restaurants, Bakeries, sweet shops and all such establishments where flying insects are a menace.

Eliminator is available in two models with both plain tubes as well as with shatter proof tubes.
